

Dear ESCV members,

In November 2022, in collaboration with the Turkish Society of Microbiology, the ESCV is organizing a **2-day workshop** in Antalya, Turkey, dedicated to **Next Generations Sequencing in Clinical Virology**. The workshop is focused on next generation sequencing, bioinformatics and diagnostics-related aspects of NGS relevant to clinical virology. It will include lectures by experts in the field, and discussions about NGS-related issues presented by the participants. The announcement and provisional programme can be found linked below, as well as the application form.

The workshop is funded by the ESCV to further the aims of the Society, which include education and improvement of our knowledge on viral diseases for the promotion of public health.

[Click here to see the AGENDA!](#)

There is **no registration fee** for ESCV members and, as a member, you can **apply for a bursary** to cover (part of) your meeting attendance expenses using the application form.

Up to 35 grants will be available from the ESCV and will provide up to €750 for travel and accommodation. Applications for on-line attendance are also accepted.

If you are not a member yet, please visit our [website](#) and **join the ESCV** for an annual fee of €40.

To apply, complete the [application form](#) and return it by email to TravelGrant.ESCV@kenes.com. Completed forms must be returned by **Friday, October 7th 2022**. Successful applicants for a bursary will be informed by October 12th, 2022. Please address any queries to the above email.

Sent on behalf of the organizing committee,

Dr Arzu Sayiner and Dr Gulendam Bozdayi
Virology Working Group of Turkish Society of Microbiology

Dr Mariet Feltkamp and Dr Heli Harvala
European Society for Clinical Virology (ESCV)

Dr Jutte de Vries and Dr Eric Claas
ESCV network for Next Generation Sequencing (ENNGS)
