

## 3<sup>rd</sup> ESCV workshop on Next Generation Sequencing: Advances in the use of metagenomics in Clinical Virology

Dear ESCV members,

In January 2023, the ESCV is organizing a **2-day workshop** in London, dedicated to **Next Generations Sequencing in Clinical Virology**.

*The workshop is focused on next generation sequencing, bioinformatics and diagnostics-related aspects of NGS relevant to clinical virology. It will include lectures by experts in the field, and further discussions about NGS-related issues. The announcement and provisional programme can be found linked below, as well as the application form.*

[Click here to see the draft AGENDA!](#)

ESCV is offering a maximum of **50 travel grants** - up to 500 £ to cover travel and accommodation and free registration for the workshop.

\*The costs exceeding the maximum of 500 £, will be supported by you.

As an ESCV member, you can **apply for a bursary** to cover (part of) your meeting attendance expenses using the **application form**.

We also offer **25 places** with the possibility for ESCV members to **attend with your own funding**; in these cases, a registration fee of **100 £ will be charged**. Please apply using the same application form.

**Please mention in the form if you are applying for travel grant, own funding, or both options** (in case you won't be granted with a travel grant, please mention if you are interested in own funding place).

If you are not a member yet, please visit our [website](#) and **join the ESCV** for an annual fee of €40.

To apply, complete the [application form](#) and return it by email to [TravelGrant.ESCV@kenes.com](mailto:TravelGrant.ESCV@kenes.com).

Completed forms must be returned by **Thursday, December 15<sup>th</sup>, 2022**.  
Successful applicants for a bursary will be informed by December 23rd, 2022.  
Please address any queries to the above email.

Sent on behalf of the organizing committee,  
Dr Heli Harvala  
**European Society for Clinical Virology (ESCV)**
